

ABOUT

The Garden of Just Because is an installation inspired by the micro view of a garden and the hidden world underneath the soil. It is a place where myth (fairy rings) and science meet. Young visitors will experience a space where sculptural forms towers above them. They will be able to activate the LED to light up the mycelium network that runs all the way up into the chanterelle mushrooms.

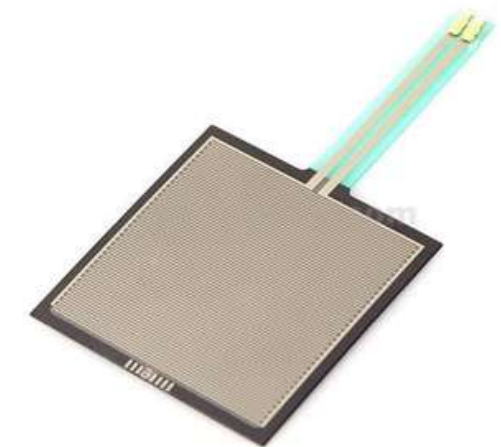

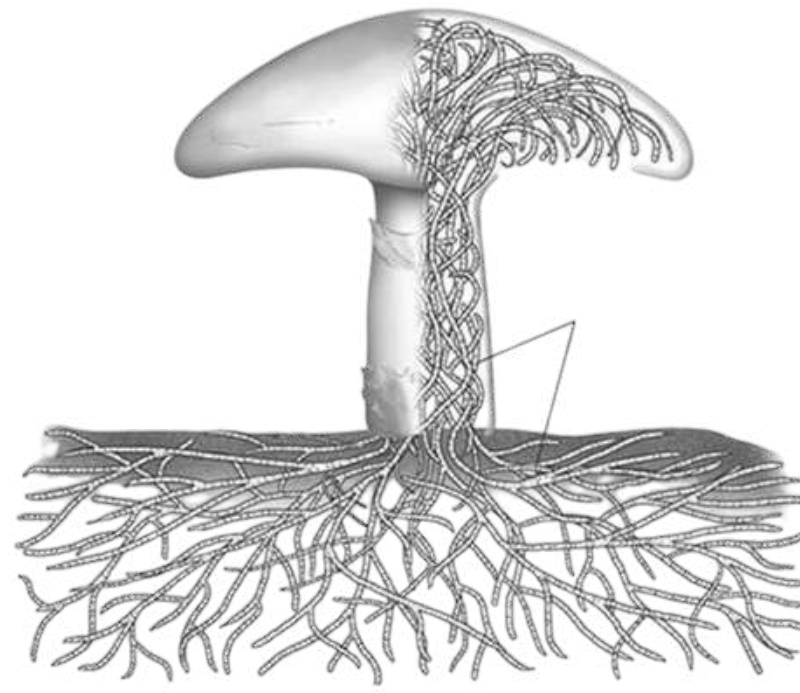

Mat is 2 X 2.30 meters

LED strips
on the mat

light the base of the mushrooms

force sensors

Felt rug used for the floor in the installation(soil) - embed LEDS will run in between the felt and will be covered with a white felt mycelium network. The audience will activate the lights with their feet as they walk on the rug. .
